

Technical Bulletin #21

FMCSA - Information Systems

Subject: Blizzard v2 memory leak

Keywords: Blizzard v2, memory leak, empty zip file

Date: March 2, 2001

Symptoms: An empty zip file is created while processing ASPEN V1.5x inspections and/or an inspection processing error occurs.

Cause: While processing several batches of inspections, a memory leak causes the processing to stop.

Resolution: Call FMCSA technical support or visit the FMCSA-fsg.dot.gov website to download a self-extracting executable that will replace the necessary files to correct this problem. The files that will be replaced are listed below:

DZIP32.dll
DUNZIP32.dll
IOT32.dll
MBX.dll
